Challenge Find Code from Karthik bhaiya

Karthik 6:50 PM
Around 2 years ago I hid a code on the internet with a monetary reward of ₹50. I thought someone would find it soon, but since no one has found it yet if anyone finds it within 48 hrs the reward will be bumped to ₹500. After 48 hours the reward will be ₹250.

Search for everything on the internet about me and you shall find the secret code.
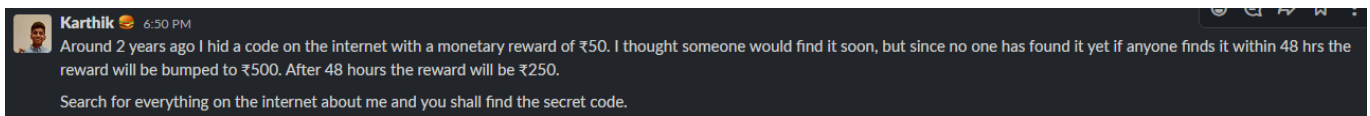

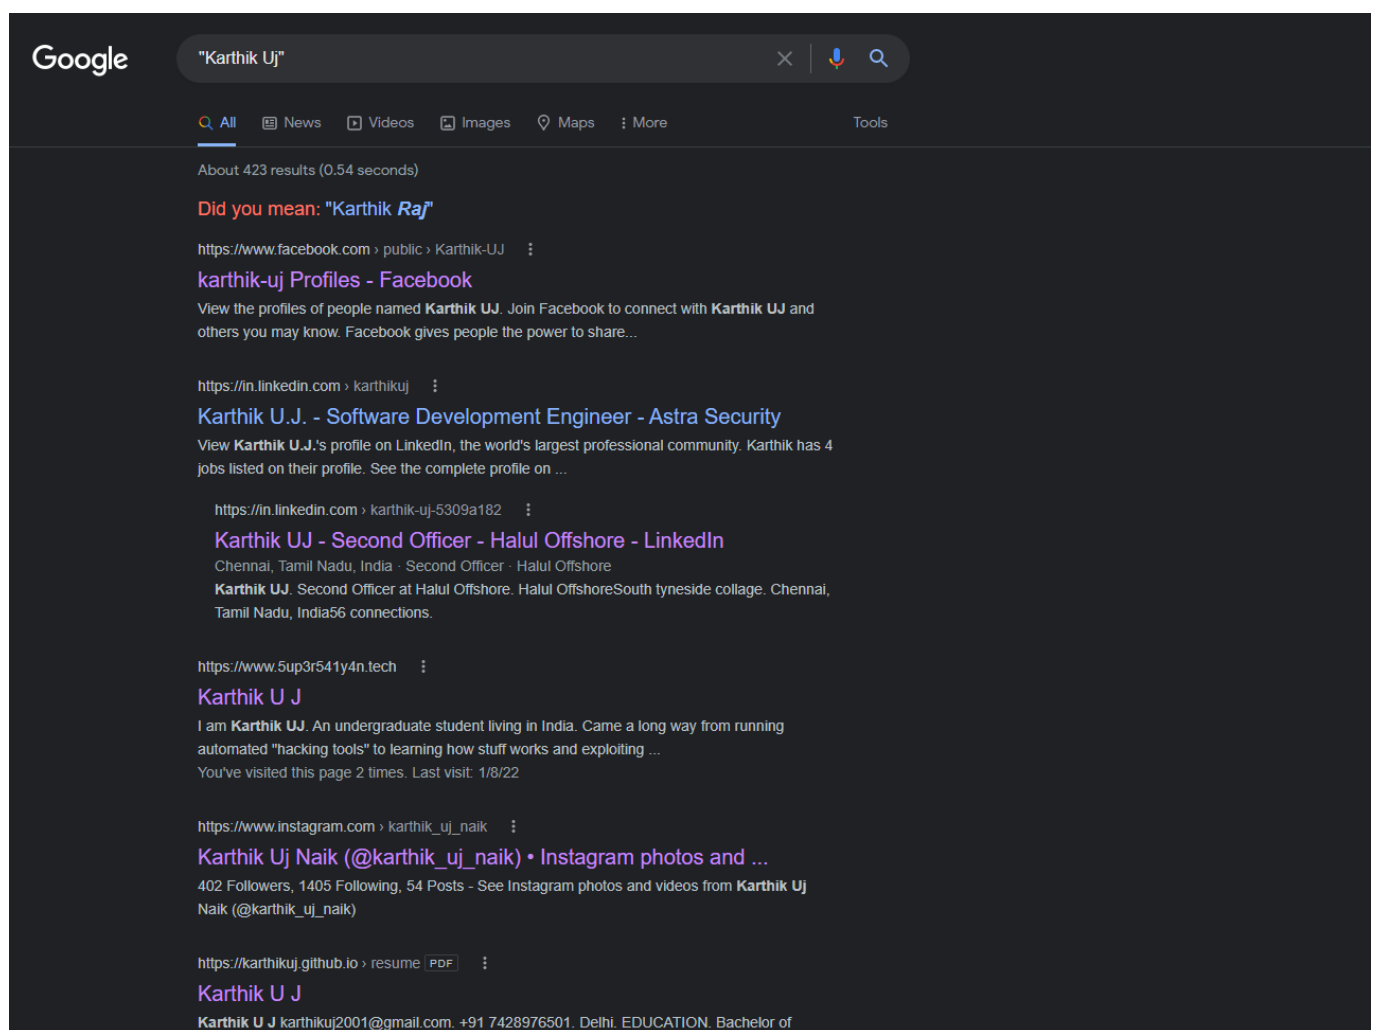

Scenario 1 Social Media:

The first thing to do will be searching full name of the person you are finding about in my case
Karthik bhaiya: "Karthik Uj"
you can search normally but i would suggest using google dorking as it filters your query to the extent you want to

Now i go deeper in the rabbit hole and research more about bhaiya and found out his school (altho it didnt have anything to do with the challeneg i founded out later)

I couldnt found anything but I still insisted on finding the code

altho I found some things like previous username in one of the social media also irrelevant

All the night I was fixated upon social media

I wanted to find the code without any hint but i wasn't finding any leads

So I asked bhaiya for a hint and the hint was

(IT IS NOT ON ANY OF MY SOCIAL MEDIA PROFILES. You can continue searching whatever remains of me on the internet.)

Scenario 2 The Portfolio website:

Since it is not on any social media the only thing left for me to check was portfolio website Portfolio
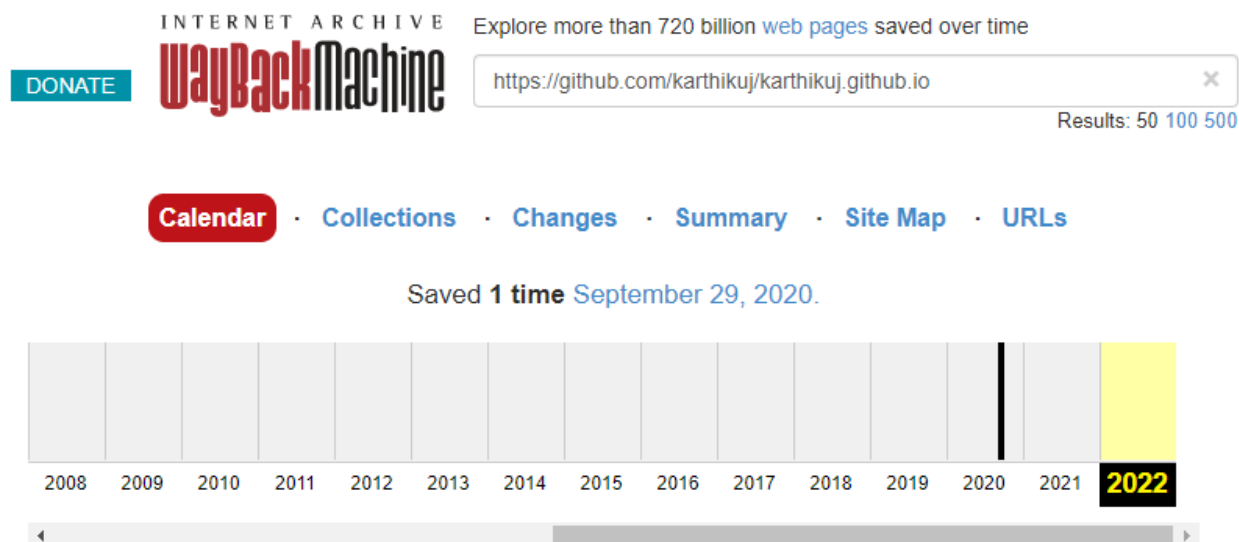

So i checked if there is any archive of the portfolio website because in the challenge it was said that the code was hidden two years ago

ITs time to go way back in time

sadly nothing found but i didnt loose hope

what if i try to find archive of the github repo of the portfolio maybe there could be a clue there since i cant find anything else

aha i found an archive in 2020 which is 2 years ago

lets find whats inside the archive

woho we found the commit on aug 30

when we go to that commit we found the code inside index.html

```
<!--
    If you are reading this DM me this code (ZWplqoKL) on instagram (@5up3r541y4n) to get 50 rupees PayTM cash.
    Offer for only for the first person to find this easter egg.
